Girl TEENS

HEAL RAPE INCEST

VICTORIOUSLY EMERGE

1 out of 4 girls will be sexually abused before her 17th birthday

Incest and all sex abuse knows no color, class or nationality. These girls are our nieces, neighbors, girls on the soccer team, the debate club. Over 90% of sex abuse happens within families and with trusted friends or relatives. Incest survivors are often financially dependent on their abusers, and the incest continues. Without the support of her mother, or other relatives she often has no-one to go to for help. She has kept her secret and by the time a girl discloses her sexual abuse she already feels alone, isolated, confused and frightened. An incest survivor with no emotional support may be compelled to run away and she may be sexually exploited again through prostitution and/or exotic dancing. She may turn to drugs, become depressed and/or suicidal, she is at high risk for rape. A girl who is sexually abused by her father, stepfather, brother, uncle believes the abuse is somehow her fault. These wonderful girls have not been safe, physically or emotionally.

Girlthrive Inc. changes this by giving these amazing girls our support, respect, hope, understanding & love .
